

SAHIBJOT SINGH

FULL STACK DEVELOPER | MERN STACK | REACT.JS | NODE.JS | AWS

sahiblinkedin2525@gmail.com | +91 74040 27403 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, and REST APIs. Currently working as an SDE Intern at Grazitti Interactive, developing production-ready features, authentication systems, and backend services. Passionate about system design, cloud technologies, and solving real-world engineering problems.

WORK EXPERIENCE

SDE Intern — Grazitti Interactive

June 2026 - Present

- Built and maintained scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB, following component-based architecture and responsive design principles.
- Designed and implemented secure REST APIs with JWT authentication, authorization, and CRUD database integration for production features.
- Collaborated with cross-functional teams using Git workflows and Agile methodologies to deliver production-ready features, including debugging and performance optimization.

Tech: React.js, Node.js, Express.js, MongoDB, Git, GitHub

PROJECTS

DevMentor AI

- Built an AI-powered career assistant that parses resumes and generates personalized interview questions and role-specific preparation roadmaps.
- Implemented JWT-based authentication and integrated LLM-driven recommendations via the OpenAI API for context-aware feedback.
- Designed MongoDB data models to support real-time progress tracking and state management across user sessions.

React.js • Node.js • Express.js • MongoDB • OpenAI API • JWT

CloudOps Copilot

- Developed an AI-powered cloud operations assistant that analyzes AWS infrastructure metrics and surfaces actionable recommendations for engineers.
- Integrated CloudWatch for real-time metrics collection and automated alert generation on anomalous resource behavior.
- Automated cloud monitoring workflows and incident diagnosis using Python-based analytics to reduce manual triage effort.

AWS • CloudWatch • Python • React.js • Node.js

LogHawk Security Analytics Platform

- Developed a cloud-native security analytics platform for real-time authentication monitoring, log aggregation, and threat detection.
- Implemented centralized JWT and authentication log processing with automated brute-force attack detection rules.
- Built a monitoring dashboard with automated security alerting workflows to surface suspicious activity to engineers.

AWS • Linux • Node.js • MongoDB • REST APIs

ACHIEVEMENTS

- Earned Google Cloud Skills Boost Legend status by completing 50+ hands-on cloud labs and challenge tracks.
- Solved 200+ Data Structures & Algorithms problems across LeetCode and HackerRank.
- Earned 5★ Problem Solving and 5★ SQL ratings on HackerRank.
- Ranked in the Top 3% globally in TryHackMe's Advent of Cyber cybersecurity challenge.

SKILLS

Languages: C++, JavaScript, SQL, Python

Frontend: React.js, HTML5, CSS3, Responsive Design, Component-Based Architecture

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Authorization, CRUD, MVC

Databases: MongoDB, MySQL

Cloud: AWS, CloudWatch, Google Cloud Platform

Developer Tools: Git, GitHub, VS Code, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Practices: Agile, Git Workflow, Debugging, Error Handling, State Management, Performance Optimization, Async Programming

CERTIFICATIONS

- Google Cloud Skills Boost — Legend
- HackerRank SQL (Intermediate)
- HackerRank Problem Solving
- Microsoft Elevate Program

EDUCATION

Bachelor of Computer Applications — Kurukshetra University

2024 - 2027

CGPA: 9.57 / 10
